SUMMARY OF QUALIFICATIONS

- Energetic and technically skilled student with strong coding and programming experience, particularly in Python, Java, C/C++, and JavaScript.
- Designed and taught TMU's introductory Python prerequisite course, creating beginner-friendly lessons, examples, and hands-on exercises.
- Experienced in mentoring students with no prior coding experience, providing guidance, clarifying concepts, and fostering problem-solving skills.
- Organized and led beginner-friendly technical workshops through Frontier (Student Space Society), including robotics and coding sessions.
- Strong communicator with a passion for inspiring young learners, encouraging innovation, teamwork, and analytical thinking.

Languages: Fluent English and Hindi.

Technical Skills:-

Programming Languages: Python, Java, C/C++, Rust, Haskell, Elixir, Smalltalk, Lisp, HTML

Tools & OS: Linux, Windows, WordPress, MS Office, Google Workspace

Robotics & Hardware: Sensor integration, Arduino, 3D printing, mechanical assembly, prototyping

Other Skills: Teaching/mentoring, documentation, testing workflows, website development

EDUCATION

Bachelor of Science (B2027): Computer Science
Toronto Metropolitan University, Toronto, ON

09/23 – Exp 2027

WORK EXPERIENCE

Temporary Assistant, Toronto Metropolitan University

07/25-08/25

(Internship)

- Cleaned and standardized large datasets to study teamwork dynamics in student projects.
- Delivered insights on collaboration, group performance, and workload distribution.
- Applied analytical problem-solving and data visualization skills.

Temporary Assistant, Toronto Metropolitan University

05/24-08/24

(Internship)

- Co-designed and launched **CPS000, TMU's introductory Python prerequisite course** for first-year students.

- Developed beginner-friendly lessons, demonstrations, and hands-on exercises to teach Python fundamentals.
- Mentored students during lab sessions, clarified programming concepts, and provided guidance to students with no prior coding experience.
- Strengthened instructional design, communication, and teaching skills

Lead Instructor, [Young Engineers](#)

01/26-Present

(Part-time)

- Deliver hands-on robotics and STEM instruction to students aged 5-13, teaching core mechanical and engineering principles including gears, levers, motors, and basic mechanisms through interactive building activities.
- Design and facilitate engaging learning sessions that simplify complex scientific concepts and encourage curiosity, creativity, and experimentation.
- Guide students through robotics projects and problem-solving challenges, helping them develop early skills in engineering thinking, teamwork, and analytical reasoning.
- Foster an inclusive and supportive learning environment that builds confidence in STEM and practical understanding of real-world engineering concepts.

SEO Intern, Cuddles Learning

12/25-04/26

- Expert at translating complex coding and STEM concepts into clear, actionable insights for teams and stakeholders.
- Skilled in researching, evaluating, and delivering precise, efficient solutions under deadlines.

ROBOTICS PROJECTS & COMPETITIONS

[IBZ Premier League – Robotics Soccer Car \(2× Competitor\)](#)

Summer 2025, Summer 2024

- Competed twice, gaining advanced understanding of robot design and gameplay strategy.
- Assembled a soccer-playing robot with custom 3D-printed parts, and optimized motor control.
- Performed iterative testing, debugging, and real-time performance refinements.
- Strengthened competitive decision-making, engineering collaboration, and creative problem-solving.

Arduino Line-Following Robot Workshop (Attendee)

Fall 2025

- Built and programmed a fully autonomous **line-following robot** using Arduino.
- Implemented IR sensors, motor control logic, and calibration techniques.
- Learned fundamentals of embedded programming, sensor tuning, and design optimization.

[BattleBots-Style Robotics Competition \(Attendee\)](#)

Fall 2025

- Observed competitive robotics design, focusing on mechanical assembly, mobility, and control systems.

Rocket Building – MARS (TMU)

Fall 2025

- Contributing to mechanical and systems integration, testing, and troubleshooting

Other Projects: Python Bookstore Simulator, Digital Feedback Form System, Storytelling Website development, Hosted Web Systems at TMU

VOLUNTEER EXPERIENCE

Research Assistant, [CIRCLE Lab](#) (TMU)

07/24- Present

- Managed data collection, cleaning, and analysis under strict deadlines.
- Strengthened accuracy, attention to detail, and collaborative problem-solving.

Volunteer, [Autonomous Robotics and Continuum Systems \(ARCS\) Lab](#) (TMU)

02/26-Present

- Supported lab activities and collaborative technical initiatives

Project Officer, [Frontier](#) (Student Space Society)(TMU)

09/24- Present

- Designed and delivered beginner-friendly robotics workshops, including hands-on builds and demos.
- Guided participants with varying experience levels, fostering creativity and problem-solving skills.

Junior Frosh Leader, [Faculty of Science - Toronto Metropolitan University](#)

08/25- 08/25

- Supported first-year student onboarding, guiding and troubleshooting in live events.

Volunteer and attendee, [WSEDS Inaugural Conference: Women Defying Gravity](#)

07/25- 07/25

- Assisted in event execution and troubleshooting logistics, ensuring a reliable and professional experience for attendees.
- Applied coordination and issue-resolution skills to adapt in real-time during live sessions.

Central Orientation, Toronto Metropolitan University

09/24- 09/24

- Supported student onboarding by providing real-time troubleshooting and guidance in high-traffic environments.
- Demonstrated interpersonal skills, flexibility, and responsiveness under time-sensitive conditions.
